CHOOSING THE CORRECT CABINET AND DRAWER SIZE(S)

When selecting your cabinet and drawers you will need to consider all of the following:

- The size of the items you will be storing from both a plan and elevation perspective
 - See usable drawer dimensions on next pages to determine if items will fit within the drawer
 - See usable height in the drawer table to select the appropriate drawer height
- The area within your facility you have available
 - See cabinet footprint dimensions on next pages to select the model required (drawer and cabinet footprint designation must match)
- The aisle space required between cabinets and in front of cabinet for proper access to drawer contents
 - Below you can see the typical space requirements for both full and shallow depth cabinet aisles

This overhead view shows two rows of Lista shallow depth cabinets on either side of a comfortable 36" wide access aisle. The aisle leaves enough room for a fully extended drawer and the person accessing it. The cabinets and aisle occupy a total depth of 6' 9".

This overhead view shows two rows of industry standard cabinets on either side of a 42" wide access aisle. This width aisle is required to accommodate a fully extended standard drawer and the person accessing it. The cabinets and aisle occupy a total depth of 8' 2".

5. SELECT DRAWERS, SHELVES, ROLL-OUT TRAYS AND/OR DOORS

Drawers, shelves and roll-out trays can be arranged and re-arranged in a cabinet housing in any sequence. See the graphic on page 4. for information on configuring the correct height(s) of drawers and doors to fit the housing you have selected.

Drawers

Drawers are 100% full extension, allowing complete use of the furthest corners and easy access to all contents. Each drawer has a maximum load capacity of either 440 lb. (200kg) or 165 lb. (75kg).

Shelves

Fixed bottom shelves and adjustable upper shelves can be moved up or down in 1" increments. Vertical dividers are available to sub-divide shelves. Shelf cabinets are often stacked above drawer cabinets for maximum space savings. Maximum load capacity of 440 lbs. (200kg) evenly distributed.

Roll-Out Trays

Roll-out trays allow easy access to stored items, even in the farthest corner. 100% full extension, 440 lb. (200 kg) or 165 lb. (75kg) maximum load capacity.

Retractable Door

Door slides out and back, stored out of the way when not in use. Door is provided with handles, individual lock (RG) and 2 keys. Only bottom and adjustable shelves may be installed behind retractable doors – no drawers or roll-out trays. See pages 8-9 for lock options.

Options: Add "-P" for window option on 450 and taller

HOW TO ORDER CUSTOM DRAWER PARTITIONS AND DIVIDERS

These are the basic steps required for ordering custom drawer partitions and dividers from Lista.

The Lista Drawer Subdivision System

Lista drawers are subdivided using 2 basic accessories: partitions, which divide the drawer into rows, and dividers, which define compartments within those rows.

The part designations for ordering partitions or dividers have 3 components:

1. **A letter or letters prefix indicating the part.** "P" is for slotted drawer partitions, "LP" is for plain drawer partitions, and "D" is for drawer dividers.
2. **A number indicating the drawer model (height) number,** and therefore the height of the partition or divider.
3. **A number indicating the length of the partition or divider** in slots/units.

Drawer slot/unit dimensions are as follows:

DRAWER STYLE	WIDTH	DEPTH
NW	19 units	36 units
MP	27 units	36 units
SC	36 units	36 units
EW	45 units	36 units
HW	54 units	36 units
MW	64 units	36 units
DW	78 units	36 units

The examples to the right use an HS Width shallow depth cabinet drawer (40 1/4" wide) which has 54 slots/units side to side and 27 slots/units front to back.

Easy-Order Drawer Interior Sets:

Preconfigured drawer interior sets (see pages 56-63 and 90-99) for many popular drawer layouts are available for all sizes of Lista drawers:

DRAWER STYLE	WIDTH	DEPTH
NS	19 units	27 units
CL	27 units	27 units
S	36 units	27 units
ES	45 units	27 units
HS	54 units	27 units
MS	64 units	27 units
HT	78 units	27 units

Slotted and Plain Drawer Partitions

Partitions can divide a drawer into either horizontal or vertical rows.

The length of the partitions used in a drawer is determined by the number of slots/units in the drawer, front to back or side to side.

EXAMPLE A: if you want to divide a model HS100F drawer into 3 sections each, running front to back, order 2 slotted drawer partitions **P100-27**.

- P** = slotted drawer partition
- 100** = drawer height model number
- 27** = units front to back

EXAMPLE B: if you want to divide the same drawer into 3 sections running side to side, order 2 slotted partitions **P100-54**.

- P** = slotted drawer partition
- 100** = drawer height model number
- 54** = units side to side

Steel Drawer Dividers

To further divide drawers into smaller compartments, order aluminum drawer dividers. To divide each of the 3 sections in the previous examples into 3 smaller sections, you would order 2 drawer dividers for each large section or a total of 6. **To subdivide drawers using dividers, you must specify slotted drawer partitions.**

EXAMPLE A: if you have divided the drawer into 3 equal sections running front to back, each section is 18 slots/ units wide ($54 \div 3 = 18$). So order 6 **D100-18** dividers.

- D** = drawer divider
- 100** = drawer height model number
- 18** = units wide

EXAMPLE B: if you have divided the drawer into 3 equal rows running side to side, each section is 9 slots/ units wide ($27 \div 3 = 9$). So order 6 **D100-9** dividers.

- D** = drawer divider
- 100** = drawer height model number
- 9** = units wide

PARTITIONS AND DIVIDERS

Slotted Drawer Partitions

These slotted steel sheet partitions are the basic drawer dividers. They divide drawers into small or large compartments by length and/or width. Partition ends slide easily into drawer sidewall slots and can be bolted to the perforated drawer bottom. Partitions are slotted at $2\frac{1}{32}$ " intervals to match the drawer sidewalls and should be ordered to match particular drawer heights, widths and depths (see chart). Color: gray.

Plain Drawer Partitions

For use when drawers will not be subdivided using dividers. These non-slotted steel sheet partitions divide drawers into larger compartments either by length or width. Bottom strips can be bolted to the perforated drawer bottom for additional stability, and the ends slide into slots in drawer sidewalls or slotted drawer partitions. Plain partitions should be ordered to match drawer sidewall height. Color: gray.

Steel Drawer Dividers

Dividers subdivide drawers into smaller compartments for specialized storage. Steel dividers come in a variety of lengths and slip into slots in drawer sidewalls and/or slotted drawer partitions. Top edges are rounded and smooth for safety. Full-width angled top can accommodate most text and barcode labels. Dividers can be fastened to drawer bottom for greater stability (fasteners included). Dividers should be ordered to match drawer sidewall height.

 - KA** = keyed-alike
 - MA** = master

All cabinets lock at bottom.
- Select paint color.** For color chart, see back cover.

EXAMPLE: to order an OHC2316 overhead cabinet with a retractable door, an individual lock and Bright Blue paint, the part number would be **OHC2316-RDRGBB**.

Lista overhead cabinets can be mounted to a wall for stability and permanence. Mount either directly to the wall with customer-supplied hardware, or by using a Wall Mounting Kit.

Overhead cabinets can also be easily mounted atop a stationary riser shelf for convenient support without having to mount the unit to the wall. Stationary riser shelves are available either with or without a back panel, and can be situated above any counter top.

Wall Mounting Kits

Brackets for mounting overhead cabinets to wall. Starter kit is required for first cabinet in row. One adder kit is required for each additional cabinet used. Starter kit includes brackets and end filler strips; adder kit includes brackets only. Color to match housing.

CABINETS: Shelf Cabinets

Shelf cabinets are an efficient means for storing bulky items that don't lend themselves to drawer storage. Shelf cabinets are built with the same all-steel construction as all Lista cabinets.

Sliding door shelf cabinets are often stacked on complementary sized drawer cabinets, so smaller drawer contents and bulky items can be stored and locked together. The sliding door lock can be positioned at the door bottom to facilitate stacking.

Lista rides to the rescue at Harley Davidson's Vehicle Maintenance and Repair Department. Lista sliding door shelf cabinets, housing large items such as motor oil, greasing and cleaning agents, sit atop drawer cabinets, which store small parts such as nuts, bolts and o-rings.

At the Production Control Center of San Diego's Naval Air Depot, double hinged door cabinets safely and securely store a wide variety of electronic test equipment and supplies used for the precision modification and repair of tactical air navigation transmission boxes.

Stacked sliding door cabinets at Marine Spill, a marine emergency response company, maximize use of available floor space, while providing inventory control and fast retrieval.

SLIDING AND HINGED DOOR SHELF CABINETS

Shelves have a maximum load capacity of 440 lbs. (200kg) evenly distributed and can be moved up or down in 1" increments for the greatest flexibility in arrangement. All units have a stationary bottom shelf and are equipped with the number of adjustable shelves shown in the charts to the right. Optional vertical dividers are also available. All models are shipped fully assembled as described. (See pages 6-7 for cabinet dimensions.)

Self-Adhesive Label Holders

Plastic hinged label holder adheres to face of shelf to allow identification of shelf contents. 13/16" high. Does not include label paper. For Lista Script, use 18.932 labels.

Individual Casters

Individual replacement casters (not mounted to a mobile base) are available to suit the weight-bearing needs of your application. Capacity shown is per caster.

Industrial strength polyurethane tread bonded to "ribbed" polyolefin core. This design adds strength for loads subjected to shock and hard impacts. Tread is molded in, around and through a ribbed extension of the core to prevent debonding. Standard colors are red tread on grey core.

Not recommended for conditions of continuous operation such as tow-line, etc. Temperature range: -45°F to +180°F.

Hardness: 55(±5) Durometer Shore D scale.

Performa wheels offer the advantages of both hard and soft tread materials in a single wheel. Like a hard tread wheel, Performa rolls easily and is very durable. Like a soft tread wheel, it rolls quietly, protects floors and resists impacts with a cushion ride. It also features maximum weatherability, low temperature flexibility, resistance to chemicals, water and steam, and rejects floor debris such as metal shavings. Non-marking thermoplastic elastomer tread is permanently bonded to ribbed polyolefin wheel core.

Temperature range: -45°F to +180°F intermittent service (120° continuous service).

Hardness: 65(±5) Durometer Shore A scale.

CNC AND MACHINE TOOL STORAGE, TRANSPORT AND USE CYCLE

With our many different CNC tool storage products and accessories, Lista provides an efficient, organized and secure link among all the various stages of tool storage, transport and use.

Sliding door machine tool cabinets with butcher block tops provide both complete protection for tooling and a highly functional worksurface at Galileo Electro Optic Corporation's machine shop (left) and F&S Tool (right).

From the smallest shop to the largest machining operation, Lista can economically provide everything you need for safe and efficient storage of valuable tools.

The Lista Storage Wall® System is used to store a variety of different-sized CNC tooling at Tremec, a manufacturer of manual transmissions. This vertical solution maximizes Tremec's floorspace while providing the company with safe, secure and completely organized CNC storage. For more information on the Lista Storage Wall System, see pages 132-133..

Lista CNC tool transporters are used to safely deliver tools directly to the work area at Continental Machines, a leading machine tool and hydraulic component manufacturing company.

TOOL HOLDERS

Safety and ease of use for storage and transport are the priorities in the design of the Lista system. Our tool holders are the basic components of an integrated solution to vertical storage of pre-set tools. Lista tool holders are ideal for all types of pre-set tool handling. Even if only small numbers of tools are involved, safe and accessible storage adjacent to machines is economical.

Molded Tool Holders

Tool holders are made from ABS high impact and oil resistant plastic that protects the heaviest tool shanks. Tool holders are designed to be held securely in place on either Lista tool trays or tool holder frames. Tool holders are available in red and green for easy visual identification of sharp and dull tooling.

Custom Tool Holders

Lista will modify blank inserts for any type, size or brand of tool holder (ABS, Capto, etc.). Each custom tool holder holds one tool. Provide your Lista representative with drawings and dimensions of the specific tools, and we will modify the blanks to your precise specifications. Tool holders are available in red and green for easy visual identification of sharp and dull tooling.

Tool Inserts

The tool blank fits a TT-1 tool tray, TF2736 tool frame or TF3636 tool frame. By boring or drilling (up to a maximum of 4" diameter), you can create custom tool holders to your precise specifications. The insert is made of 3/4" thick UHMW (ultra high molecular weight) polyethylene. Tool Inserts are available in red and green for easy visual identification of sharp and dull tooling.

HOW TO CONFIGURE A STORAGE WALL® SYSTEM

Length of Storage Wall® Systems

To determine actual Storage Wall length, add together the sections you are assembling and add an additional 2". If end panels are used, add 29/32" for each.

SECTION WIDTH	LENGTH BETWEEN SIDE FRAME CTRS.
CL/MP width (27 units)	22 1/16" (561mm)
ST/SC width (36 units)	28 1/8" (714mm)
ES/EW width (45 units)	34 1/8" (867mm)
HS/HW width (54 units)	40 5/32" (1020mm)
MS/MW width (64 units)	46 7/8" (1190mm)
HT/DW width (78 units)	56 1/4" (1428mm)

1. Select Vertical Side Frames.
2. Select universal panels and optional lock system panels.
3. Select rear panel or sway braces and optional end panels.
4. Select drawers, shelves, and roll out trays.
5. Select system options – doors, book cases, etc.
6. Select paint colors.

System frame and panels can be a different color from drawer fronts, but drawer interiors are always gray.

1. **Select Vertical Side Frames** - Heavy duty one-piece vertical uprights with welded horizontal struts. Uprights are slotted at 1" increments for placement of drawers, roll-out trays or shelves.
2. **Select Universal Panels** - Steel sheet universal panels measure 2" (50mm) in height and are fastened to the top and bottom of the vertical side frames to complete each section. Sections with vertical side frames 2200 or greater must have a third intermediate universal panel.
3. **Select Rear Panels or Sway Braces and Optional End Panels** -
 - Rear Panels - Panels are bolted to the vertical side frames to enclose the rear of each section and provide lateral stability.
 - Sway Braces - Used for units without rear panels to provide the necessary lateral stability. Diagonal braces must be fitted at least every fourth section.
 - End Panels. These optional steel sheet panels enclose the ends of the completed units. Hardware included.
4. **Select Drawers Shelves and Roll-Out Trays** - Roll-out trays can be mounted in any sequence or combination with drawers and shelves. Each tray uses the equivalent height of a 100 drawer (100mm high). Trays have full length handles, galvanized insert

panels, and 1 3/4" rear and side retaining walls. Be sure to order trays to match the particular section width and depth you are outfitting.

- Usable depth of tray or shelf is based on system depth and referenced in charts on corresponding sections.
 - Heavy Duty Roll-Out Tray - Weight capacity is 770 lbs. for evenly distributed loads.

This corporate aircraft operator wanted to upgrade its maintenance facility to match the quality of its aircraft. Several mobile benches, including this mobile inspection station, are used in the company's hangar and support shop.

The mobile workbench used at this electronic repair facility brings repair tools and parts right to the point of use, without sacrificing durability and drawer storage space. The companion mobile storage cabinet (designed to be stored between the workbench cabinet pedestals) adds to the flexibility of this arrangement. For information on ordering mobile workbenches with two cabinet pedestals, contact your Lista distributor.

TECHNICAL ELECTRONIC WORKSTATIONS

Featuring a sleek, aesthetically pleasing design, the real beauty of Lista's technical electronic workstations is their ability to perfectly suit the widest variety of applications.

Our modular approach is the key to our technical electronic workstation's versatility, with flexible standard components and accessory options both above and below the worksurface, leading to greater productivity and efficiency.

Many configurations feature a built-in electrical power supply, conveniently located on either an instrument riser or as a part of the Nexus accessory system (for more on the Nexus system, see pages 184-193).

Choose from a wide array of static-safe components, including ESD paint, worksurfaces and shelves, conductive plastic boxes and grounding accessories.

Technical electronic workstations have a 1,000 lb. (454kg) weight capacity, and can be configured with a variety of leg and cabinet pedestal choices, including mobile bases for increased flexibility and ease of reconfiguration. Mobile workstations can be quickly moved to and from a work site.

Wide choice of above-worksurface accessories

Access to electrical power available on instrument risers and Nexus Accessory System

Durable worksurfaces come in multiple lengths and depths, in a choice of materials, including ESD

Front and rear top support rails protect integrity of worksurface

Choice of pedestal and leg supports, including Tech Leg, Tech Panel Leg and a large selection of cabinet pedestals

Choice of leveling glides or mobile casters (for 4-leg configurations)

TECHNICAL ELECTRONIC WORKSTATIONS

Easy-Order technical electronic workstations include Narrow Width (16 7/8" wide) cabinet pedestals (see pages 66-74 for descriptions).

HOW TO ORDER TECHNICAL ELECTRONIC WORKSTATION CUSTOM CONFIGURATIONS

These are the basic steps required for ordering custom technical electronic workstations.

TO ORDER A PRECONFIGURED COMBINATION (workstation with preconfigured accessories), see page 65.

1 Select worksurface

Select the worksurface that best suits your needs from the choices on pages 170-171. Choose the worksurface length, depth and style that you prefer.

2 Select below-worksurface accessories or bases

Select either 2-leg, 1-leg-with-cabinet or 2-cabinet configuration. Legs, stringers, bottom shelves and privacy panels are shown on pages 172-173. Hanging cabinets are shown on page 181. To select a cabinet pedestal(s), please see pages 66-74.

3 Select above-worksurface accessories

Select the back stop and end stops (page 174), shelves (instrument riser or adjustable – see pages 174-175) and/or Nexus System components (pages 188-193) that suit your needs.

4 Select colors

Select a color from the chart on the inside back cover. Cabinet housing and drawer fronts can be different colors, but drawer interiors are always gray.

Worksurfaces come in 48", 60", 72", 84", 90" and 96" lengths, and are 24", 30" or 36" deep, depending on worksurface. Other sizes are available, and certain worksurfaces are available with a bullnose front edge.

Plastic Laminate

Particle board core with plastic laminated top and sides. 1 9/16" thick. Dove gray is standard but other colors are available on request. Available in standard square edge or bullnose front edge (shown above). To order a bullnose edge, add "BN" to the end of the part number.

Static Dissipative Plastic Laminate

Particle board core with plastic laminated top and sides, 1 9/16" thick. Grounding bolt and 10' grounding cord with a 1 megohm resistor included (installation required). Standard color is dove gray but other colors available on request. Available in standard square edge or bullnose front edge (shown above). To order a bullnose edge, add "BN" to end of part number.

Worksurfaces display electrical properties within static dissipative boundaries of 10⁶-10⁹ ohms over a wide range of relative humidities (ranging from 60% RH to as low as 10% RH) to meet ESD specifications. Meets EOS/ESD S4.1 specifications. For detailed specifications, please contact Lista.

Static Dissipative Worksurface

Accessories ESD Isolation Kits

NEXUS SYSTEM FRAMES

Building your ideal Nexus accessory system is an easy process. Simply select the frames (starters and adders) that fit your worksurface width, then pick accessories of corresponding widths to mount on the frames. Accessories are easily moved and repositioned as your needs change.

Nexus Surface-Mount Frames

Frames are sturdy, heavy gauge steel, and are notched front and back at 1" increments for mounting accessories. Starter frames consist of 2 upright posts and a horizontal rail. Adder sets consist of an additional upright and horizontal rail. Uprights are available in heights of 30" and 48", and 6 widths. Foot plate is 2 3/4" x 4". Ideal companion to Lista's modular storage cabinets or workstations, overhead cabinets bring organization to the storage of binders, bulk storage or any items that require constant access, ample room and safe secure storage.

Overhead cabinets are 15" deep and available in three heights (16", 20" & 29") and widths to match drawer cabinets, Nexus frames and workbench risers. Overhead cabinets can also be in numerous ways.
